

Request Description for Consolidation of FOIA Request EPA-HQ-2018-002859 with FOIA Request EPA-HQ-2018-003151

Per the discussion between Luke-Hall Jordan and Jonathan Lubetsky of EPA and the Requester on January 30, 2018, the Requester has agreed to allow EPA to consolidate the email search and release of responsive email records pertaining to FOIA Request EPA-HQ-2018-2859 with her later FOIA Request EPA-HQ-2018-3151. Both these FOIA requests seek records pertaining to the actual or potential effect of nitrous oxide on the stratosphere, including stratospheric ozone. EPA agreed to make a partial release of documents in the possession of its Stratospheric Protection Division that are responsive to FOIA request EPA-HQ-2018-002859 and are not exempt from disclosure prior to closing this FOIA request for consolidation with FOIA Request EPA-HQ-2018-003151.
